

About Us :

We are a unique and diverse forum where professionals and businesses may enlighten others about how and what they are doing to impact communities. The CNA of New Jersey began in Hudson County in 1987 to inspire and connect community leaders, social services, and resources to those in need through the power of networking. Made up of individuals, organizations, businesses, and agencies. From the Hudson County CNA success, we have expanded our presence and strengthened connections within 8 counties and many more to come!
